Pipe notchers - ARBOGA 150 RB

ARBOGA 150 RB is, first and foremost, a pipe notcher which grind pipes of all types (round, square, solid) and with diameters of between 17 mm and 100 mm.

However, the 150 RB and RBX models are more than just efficient pipe grinders.

They can be converted into a normal belt sander in just minutes when all pipe grinding tasks are finished.

They can then be used for standard grinding tasks.

If you need to grind the pipes with a centreless grinder, you can attach the centreless unit onto the 75 model: 3 grinding processes in one machine.

Model RBX is delivered complete with built-in exhaust system.
